Engineering Excellence is in the Design

Suncor Stainless Adds New Larger Sizes and a Stronger Design to Their Eye Slip Hooks

Plymouth, MA – August 6, 2013 – Suncor Stainless, Inc. has expanded their line of stainless steel eye slip hooks to include 3 large sizes, as well as a redesigned look. This new design offers added strength, while the increased sizes allow for use on large scale lifting applications where chain slings are required.

The new sizes include 5/8", 3/4" and 1", with working load limits up to 20,000 lbs. They are drop forged and load rated. "These hooks were developed to meet the demand for larger size hooks and increased working load limits," says Jim Storrer, Engineering Manager at Suncor Stainless. "The new I-beam design increases the load bearing surface and offers maximum strength". They also feature a removable latch and are made from grade 316 stainless steel for corrosion resistance and durability, making them ideal for various marine and industrial lifting applications.

Suncor Stainless has a network of dealers throughout the United States and Canada that offer these eye slip hooks and other quality hardware. Please contact a Suncor sales representative to find a dealer near you. To learn more about these hooks or other Suncor Stainless products, please visit www.suncorstainless.com or call (800) 394-2222.

Suncor Stainless, Inc. is a leading manufacturer for stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial industries. Suncor's modern facilities manufacture the highest quality stainless steel chain, wire rope assemblies and custom parts. The in-house capabilities include a product development staff whose tireless efforts, along with valuable input from clients, work to continuously improve and perfect their ever-expanding product line.
