## **Suncor Disassembles the Shackle**

### **Suncor Stainless Now Offers Individual Stainless Steel Shackle Components**

Plymouth, MA – October 1, 2013 – Suncor Stainless, Inc. has begun to offer their stainless steel shackle components individually. They now feature 5 different style components with over 40 sizes. This will allow their marine and industrial customers the opportunity to purchase only the part of the shackle they need or mix and match components to make the ideal shackle for their application.

Suncor manufactures a variety of shackle styles and sizes including straight “D”, long “D”, chain, twist and anchor shackles. Their current offerings also include pin styles of screw, captive, no-snap, bolt and round pins. “Sometimes our customers aren’t looking for the complete shackle,” says David Morgan, Vice President of Sales and Marketing at Suncor Stainless. “Occasionally, they require only the body or the pin. We decided to start offering these select shackle components to satisfy our customers’ ever-changing needs.” Suncor now offers chain and anchor shackle bodies, as well as, shackle bolts and domestic and import screw pins. All these components are made from 316 stainless steel and load rated. Sizes range from 1/4” to 1-1/4” and working load limits reach 14,000 lbs.

Suncor Stainless has a network of dealers throughout the United States and Canada that offer these individual shackle components and other quality marine and industrial hardware. Please contact a Suncor sales representative to find a dealer near you. To learn more about Suncor’s products, please visit [www.suncorstainless.com](http://www.suncorstainless.com) or call (800) 394-2222.

Suncor Stainless, Inc. is a leading manufacturer for stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial industries. Suncor’s modern facilities manufacture the highest quality stainless

steel chain, wire rope assemblies and custom parts. The in-house capabilities include a product development staff whose tireless efforts, along with valuable input from clients, work to continuously improve and perfect their ever-expanding product line.
