## **Take the Jet Skis on an Adventure**

### **Suncor Stainless Introduces Their New Ski Tow Tie-Down for Safe & Easy Jet Ski Transportation**

Plymouth, MA – August 7, 2013 – Suncor Stainless, Inc. has manufactured a new way to quickly and easily tie down jet skis for transportation. The ski tow tie-down features webbing looped at one end with a sewn-in stainless steel ring at the other. This new product will offer jet skiers a way to secure their jet skis without causing any damage.

The ski tow tie-down is offered in a variety of colors, including black, white, orange and blue. The overall length is 7", with a 2" loop on one side and a 3/16" ring with a bar on the other side. The primary function of this tie-down is for securing jet skis with bow and transom eyes to a trailer. To achieve this function, the webbing end is inserted through the jet ski eyes. This will provide a loop to clip the tie-down to. The stainless steel ring will sit flush on top of the eye. "This new ski tow tie-down is a great tool for securing jet skis," says Patrick Striebel, President of Suncor Stainless. "Being a jet ski enthusiast, this allows me to be an end user as well as a manufacturer. I see the problems that arise during transportation first hand and because of this; I have developed a way to solve them." With this new tie-down product, jet skiers have the ability to transport their jet skis anywhere, making the opportunities endless.

Suncor Stainless has a network of dealers throughout the United States and Canada that offer these ski tow tie-downs and other quality marine hardware. Please contact a Suncor sales representative to find a dealer near you. To learn more about Suncor's products, please visit [www.suncorstainless.com](http://www.suncorstainless.com) or call (800) 394-2222.

Suncor Stainless, Inc. is a leading manufacturer for stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial

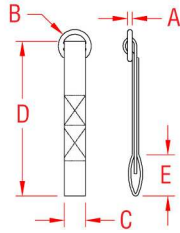

industries. Suncor's modern facilities manufacture the highest quality stainless steel chain, wire rope assemblies and custom parts. The in-house capabilities include a product development staff whose tireless efforts, along with valuable input from clients, work to continuously improve and perfect their ever-expanding product line.
