## **Suncor Breaks Down the Turnbuckle**

### **Suncor Stainless Now Offers Individual Stainless Steel Turnbuckle Components**

Plymouth, MA – August 12, 2013 – Suncor Stainless, Inc. has begun to offer their stainless steel turnbuckle components individually. They now feature 14 different style components with over 180 sizes. This will allow their marine and industrial customers the opportunity to mix and match components to make the ideal turnbuckle for their application.

Throughout their existence, Suncor Stainless has offered a variety of light and heavy duty stainless steel turnbuckles to fit the specific needs of their customers. “We have always tried to produce turnbuckle configurations that would be most beneficial to the industries that we service,” says David Morgan, Vice President of Sales and Marketing at Suncor Stainless. “During the production of our latest catalog, we had a meeting to discuss the new products we would be including. The turnbuckle components were a no-brainer. We want to give our customers the ability to create their ideal turnbuckle.”

The turnbuckle ends that will be featured in the new Suncor catalog and online include forged and cast toggles, eyes, jaws, stubs, studs, hooks and wall toggles. These components are offered in a variety of sizes from 3/16” to 1-1/4”. The body styles consist of open bodies and closed bodies with sizes ranging from 3/16” to 1-1/2”.

Suncor Stainless has a network of dealers throughout the United States and Canada that offer these individual turnbuckle components and other quality marine and industrial hardware. Please contact a Suncor sales representative to find a dealer near you. To learn more about Suncor’s products, please visit [www.suncorstainless.com](http://www.suncorstainless.com) or call (800) 394-2222.

Suncor Stainless, Inc. is a leading manufacturer for stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial industries. Suncor's modern facilities manufacture the highest quality stainless steel chain, wire rope assemblies and custom parts. The in-house capabilities include a product development staff whose tireless efforts, along with valuable input from clients, work to continuously improve and perfect their ever-expanding product line.
