What's Going on at Suncor Stainless?

## Our Warehouse Addition

### Complete and Ready to Serve You!

Over the past two years Suncor has been undergoing expansions to its locations in Plymouth, MA and Las Vegas, NV to ensure that all our customers receive high quality, innovative products as quickly as possible. The headquarters, located in Plymouth, serves as a corporate office as well as an assembly, chain manufacturing, machine parts production plant, and machine shop. The current facility covers 70,000 square feet across 18 acres and the new 50,000 square foot expansion will bring the total area of the facility to 120,000 square feet. The expansion in Plymouth was dictated by innovations to meet customer demand that will result in expanded US manufacturing operations, equipment, assembly and retail packaging operations.

## No Snag & Captive Pins Cast Shackles

### NEW Pin Options Now Available!

Suncor Stainless currently offers over 90 varieties of stainless steel cast shackles. As part of our enhanced shackle program, we have expanded our line of cast shackles to include Captive Pin and No Snag Pin styles for many of our body types. The cast shackles are made from grade 316 stainless steel for maximum corrosion resistance and durability, making them ideal for marine and industrial applications. Our Captive Pin Shackles feature a self-locking pin that will not back out. The pin is integral to the shackle body, it is not removable and will not fall out when open. These are popular for marine uses because the pin can't be accidentally dropped in the water. The No Snag Pin Shackles have a specially designed pin that sits flush with the shackle body, preventing it from snagging on lines, clothing, and deck fittings.

#### SHACKLE TYPES

1. LONG “D”, 2. WIDE “D” (No Snag Pin Option ONLY),
3. TWIST, 4. STRAIGHT “D” and 5. BOW

SIZE RANGE: 5/32” to 1-1/4”

Design allows pin to open and install attachments, but keeps pin from being fully removed/lost.

Pin head sits flush with sides of shackle body to prevent snagging.

## Pivoting Tie Down Tabs

Longlasting Hardware for Securing Your Load

The Tie Down Tab series is available with or without a ring. They are made from 304 stainless steel for maximum corrosion resistance and durability. Each features a mounting hole and is capable of rotating 360°. Available in a 1-5/16" size with a working load limit of 1,120 pounds, the Tie Down Tabs are ideal for securing or strapping down items.

## Product Highlight: Water Resistant LED Lighting

Explore our full line of Micro Star™ LED Accent and Utility Lighting

The Micro Star™ LED light bar is an easy to install lighting solution for railings, steps, fencing, and more. The light bar features a flexible LED light strip of natural white LED lights set into a powder-coated aluminum channel with a clear plastic lens. The channel colors available are black, bronze, metallic silver and white. Each kit comes with lens, LED strip, channel, and fasteners. The Micro Star™ LED Light Bar is available in 18", 30", and 42" lengths with 6 to 14 LED lights per light bar. It is ideal for mounting to the underside of handrails for surface illumination. Suncor also carries a 5 amp, 12 volt Micro Star™ Transformer and Micro Star™ Transformer Wiring Harnesses which should be used with all Micro Star™ lighting products.

## Rivet Nut Install Tool

Installs Wide Range of Rivet Nut Sizes

The Rivet Nut Installation Tool includes 14 Mandrels (right hand and left hand, UNF, UNC and metric thread) a wrench, storage case, and installation instructions. It features a scale identification, adjustable stroke and comfortable hand grips. This tool is intended to be used with Suncor's Rivet Nut Inserts. Made from grade 316 stainless steel, the inserts are offered in right and left hand, UNF and UNC thread and are used for installation in thin wall tubes or metal plates. Sizes range from 3/16" to 3/8".

**MANDRELS INCLUDED:**
