What's New for 2013!

## NEW Partner Portal

Introducing the new Suncor Stainless Partner Portal! This is where you'll find information and tools to market, sell and support Suncor products for mutual success. This portal includes installation instructions, specification, product photo gallery and a video library. To access the Partner Portal, visit the "Contact Us" page and click on the partner portal link. First time users must create a new account by simply filling in a few fields, including username, email address and Suncor account number.

## NEW PRODUCT/DESIGNS FOR THE NEW YEAR

**NEW PRODUCT**  
**Towing Bridles**

<http://www.suncorstainless.com/towing-bridle>

### Built Tough for Demanding Towing Applications

The new Towing Bridles are made from grade 316 stainless steel for maximum corrosion resistance and durability. They feature a 1" or 1-1/4" Master Link with 3 heavy duty thimbles ranging in sizes from 1/2" to 1-1/4". This new product is designed for use with today's new high strength line such as Dyneema and similar products. When integrated with high strength line, the Towing Bridle is ideal for heavy marine towing applications such as yachts, towing large tenders, work boat and barge applications.

**NEW DESIGN**  
**Eye Slip Hook**

<http://www.suncorstainless.com/eye-slip-hook>

### New Larger Sizes & Stronger Design

We have added larger sizes to our line of Eye Slip Hooks. The new sizes include 5/8", 3/4" and 1", with working load limits up to 28,000 lbs. These hooks were developed to meet the demand for larger size hooks and increased working load limits. The new "1" beam design increases the load bearing surface and offers maximum strength. These new Eye Slip Hooks feature a removable latch and are made from grade 316 stainless steel for corrosion resistance and durability, making them ideal for marine and industrial lifting applications.

**NEW PRODUCT**  
**Lashing Rings**

<http://www.suncorstainless.com/lashing-ring-weld>

### There is No Substitute for a Secure Design

Secure your next load with our new heavy duty Lashing Rings. They are designed for demanding tie-down applications. Choose from 2 different mounting styles including our bolt-on series or weld-on version, which provides flexibility in final placement. These rings are forged 316 stainless steel for maximum corrosion resistance and durability and are available in sizes ranging from 1/2" to 1". The "D" ring can fold flush when not in use. They are ideal for many cargo applications, such as overseas container shipments or long distance hauling in exposed elements.

**MASTER LINK SIZES: 1" + 1-1/4"**  
**THIMBLE SIZES: 1/2" - 1-1/4"**  
**GRADE 316 STAINLESS STEEL**  
**DROP FORGED & STAMPED**

**GRADE 316 STAINLESS STEEL**  
**DROP FORGED**  
**LOAD RATED**

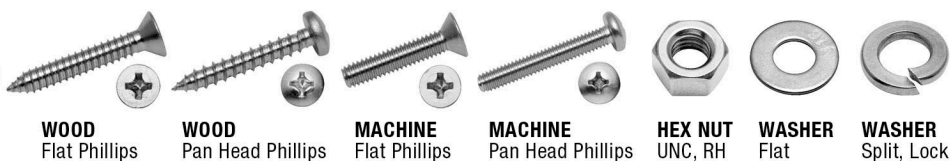

**BOLT-ON or WELD-ON**  
**RING SIZES: 1/2" - 1"**  
**GRADE 316 STAINLESS STEEL**  
**DROP FORGED**

**EXPANDED LINE**  
**Fastener Series**

<http://www.suncorstainless.com/fasteners>

## Stainless Steel Fastener Program Expansion

We have expanded our Fastener Program to include Phillips Screwdriver Bits and Fastener Lubricant. These bits are offered in #2 and #3 sizes and lengths of 1" to 2". They are available in quantities of 2 or sold in bulk. Stainless steel driver bits prevent contamination of stainless screw heads. The Fastener Lubricant is very efficient on wood screws to help eliminate any stripping of screw heads and speed the installation process. Below you will see the other fasteners and accessories included in the Fastener Program. These items are offered in a variety of styles, lengths and sizes.

**WOOD** Flat Phillips    **WOOD** Pan Head Phillips    **MACHINE** Flat Phillips    **MACHINE** Pan Head Phillips    **HEX NUT** UNC, RH    **WASHER** Flat    **WASHER** Split, Lock

# Hoisting & Lifting

## Strength & Versatility are in the Design

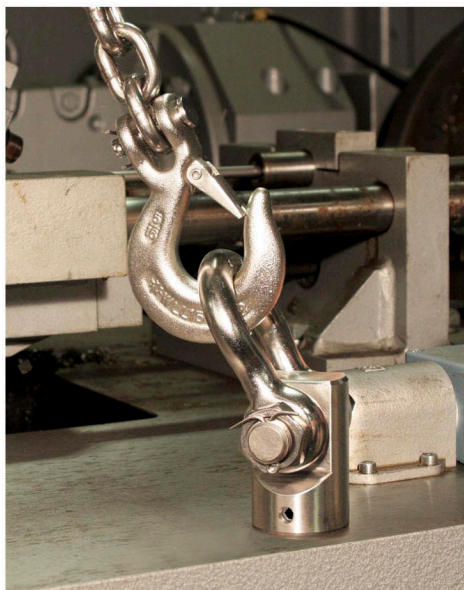

Suncor's new Hoist Anchor Base accommodates a variety of shackle types and allows for existing or custom length studs to be used. It is made from grade 316 stainless steel for maximum corrosion resistance and durability. This base is offered in sizes ranging from 1/4" – 1" to fit a wide variety of lifting applications. The Hoist Anchor Base is primarily used as a way to attach lifting points to objects with no natural attachments. The base features a set screw for securing it to the stud. The shackle has a 180° pivoting capability and the base can be secured in the desired position to provide a full range of motion. Suncor can provide custom stud lengths, matching nuts and washers and various shackle and pin styles to fit each size Hoist Anchor Base.

**SIZES: 1/4" – 1"  
GRADE 316 STAINLESS STEEL  
FOR LIFTING & HOISTING**

## PRODUCT SPOTLIGHT Hoist Anchor Base

<http://www.suncorstainless.com/hoist-anchor-base>

**Matching shackles are available. Choose from a variety of types & pin styles.**

**Order custom stud lengths to fit your application.**

**We also supply matching washers and nuts.**

We offer compatible chain shackles and bow shackles with screw, bolt and round pin styles. The Hoist Anchor Base Series is designed around the dimensions of these standard shackles and features matching working load limits for each corresponding size. Customers can order custom thread lengths (cut-to-length at our facility) and matching washers and nuts from our vast inventory.
