

JFOR IMMEDIATE RELEASE

SUNCOR STAINLESS® HAS DEVELOPED A NEW LINE OF GRADE 316 STAINLESS STEEL FORGED SHACKLES

Plymouth, MA, January 25, 2022 – Suncor Stainless® Inc., is the leading manufacturer for stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial industries. Suncor Stainless® announces the launch of a new line of Forged Shackles. These new shackles are forged, resulting in better fatigue strength for a longer product life, a higher strength due to the manufacturing process, and a harder material for better wear.

The new line of Forged Shackles is made from grade 316 stainless steel for maximum corrosion resistance and durability, making it ideal for even the harshest marine and industrial environments. Forged Shackles are suitable for lifting, if the specified working load limits (WLLs) are strictly adhered to. The WLLs for the Forged Shackle Series range from 500 lbs. to 5,500 lbs. (227 kg – 2,495 kg). With matching shackle body and pin diameters for a uniform design, the new shackles give you the option to choose from two shackle body styles: Forged Bow Shackle Body or “D” Shape Shackle Body, and two pin types; Forged precision threaded Screw Pin or a Bolt with Nut and Cotter Pin. Shackles range in size from 3/16” to 3/4” and are great for general use in applications where stainless steel is desired.

“The new forged shackle series is a key component used in our PullPro™ pulley block program. We wanted to satisfy our customers’ demands and offer them the option to also utilize the new forged shackles as a stand-alone component.”

- Patrick Striebel, President

The new forged shackle series is a key component used in the new PullPro™ pulley block program. For more information on Suncor Stainless® PullPro™ Series, visit www.suncorstainless.com.

Suncor Stainless® Inc., is a leading manufacturer of stainless steel hardware in the industrial, marine, government, architectural, OEM and commercial industries. Suncor’s modern facilities manufacture an ever-expanding product line that has become one of the world's most complete and highest quality sources for stainless steel chain, hardware and custom parts.
