Suncor Stainless[®] Lashing Ring Series

- New Bent D-Rings are angled and extend beyond the surface. They are designed to enable the user to attach lashing fittings to the ring without having to lift the ring first, which allows one-handed attachment.
- Bent D-Rings are an expansion of Suncor's standard D-Ring Shape product line series.
- Made from marine grade 316 stainless steel which wears extremely well, is tarnish-resistant, features low oxidation rates, and is resistant to corrosion when exposed to harsh environments.
- They are suitable for demanding tie-down applications as long as the specified working load limits (WLLs) are strictly adhered to. The WLLs for the series range from 3,000 lbs. to 8,500 lbs. (1,361 kg – 3,856 kg).
- Ideal for cargo applications such as overseas container shipments or long-haul trailering equipment cross country.
